

The windsock

Edi ti on 13 June 2009

From this members point of view the June 21 funfly was a great success...with a total profit raised of - ----. The crowd was a good size and the visiting flyer were from all over and with a good amount of aircraft for the spectators to get up close a personal...my personal thanks to all who worked and made the day a great success...

The snack booth work out great and the staff to service and prepare the food work out like this

- 3 persons in the booth
- 2 persons cooking sausage and hamburgers
- 2 persons cooking fries
- 3 persons cleaning and cutting fries

So all in all a huge thanks to all those who over the past year work on the booth to get it ready and work out so great

I am going to stick in pictures of the fun fly though out this sock with thanks to for wandering the day of the fly in and taking pictures

Here is a shot of the flight line sometime thought-out the fun fly day

Having said that I will now give out this news

I have heard through the grapevine that we a close to a deal on the carlsrue field but it will be a yearly agreement....

The committee is also looking for suggestions on size of cut field and its shape.... I guess to forward any suggest concerning this matter to the field committee buy email or letter.

We are going to try cutting an example of a landing field inside our field and see what flies up the flag pole.... so give it a try and we will go from there.

The shape should reduce cutting from 4 acres to only 1 acre.....lets be open minded for the next while.

Here is just and example of the quality of aircraft that showed up at our fun fly.... .

As of July 2 I still have no information on the new field ..But I do know that the "field finders" are out there trying to close a deal and figure out when the conservation authority is going to pull the plug on the field we are presently flying from?????????????

Do not forget the fun fly July 25 And if you signed up for a job to do ... please come and help out

This is your windsock for June 2009
